

Aayush Rathod
Senior Java Developer | Banking & Financial Systems | PL/SQL & ETL Expertise
Toronto, ON M5B 0C3 | +1 (416) 731-2864 | aayushrathod521@gmail.com
Work Authorization: Open Work Permit – Canada (Valid until August 2027)

PROFESSIONAL SUMMARY

- Senior Java Developer with 7+ years of experience delivering enterprise-scale banking solutions across AML, Anti-Fraud (AFS), Core Banking (CBS), and IFRS 9 platforms.
- Proficient in designing and developing distributed microservices using Java, Spring Boot, Spring Security (JWT, OAuth2.0), Kafka, MongoDB, and Oracle PL/SQL.
- Experienced in using AI-assisted development tools including GitHub Copilot, Claude, Gemini, and Codex CLI to accelerate coding, debugging, unit testing, and technical documentation.
- Strong background in ETL pipeline design using Python and Pentaho, high-volume data processing, and multi-country implementations involving large-scale financial systems.
- Skilled in Oracle database optimization, L3 production support, root cause analysis (RCA), and performance tuning.
- Experienced in Docker-based CI/CD automation using Jenkins and GitHub Actions, enabling reliable, scalable deployments in Agile and Waterfall environments.

CORE COMPETENCIES

- Programming & Frameworks: Java, Spring Boot, Spring Framework, Spring WebFlux (Reactive Programming), RESTful APIs, Microservices Architecture, Kafka, Multithreading, Spring Security (JWT, OAuth2.0), Spring Data JPA, Spring ORM, JavaScript, HTML, CSS, Shell Scripting, COBOL
- AI-Assisted Development: GitHub Copilot, Claude, Gemini, Codex CLI, Prompt Engineering
- ETL, Data Integration, Reporting: Pentaho Data Integration (PDI), Informatica, Power BI
- Databases: Oracle 11g/12c/19c, MongoDB, MongoDB Atlas, SQL Server 2019
- DevOps Tools & Cloud: AWS, Azure, Docker, Kubernetes, Jenkins, Git, GitHub Actions, SVN, PVCS, Apache Tomcat, JBoss, Cloudflare (R2, Stream), Swagger / OpenAPI
- Production Support: L2/L3 Support, RCA, Incident Management, Batch Monitoring, Autosys
- Performance Optimization: Query Tuning, Indexing, Partitioning, Execution Plans
- Operating Systems & Tools: RHEL 7/9, Windows Server 2019, Oracle SQL Developer, Jira, Confluence
- SDLC & Methodologies: Agile, Waterfall, CI/CD Pipelines, UAT Coordination

KEY ACHIEVEMENTS

- Reduced ETL job run time by 40% through PL/SQL query and job optimization.
- Automated deployment processes using Jenkins and GitHub Actions, improving release speed.
- Delivered **7+ large-scale banking projects** across Oman, Saudi Arabia, Dubai, Philippines, Mauritius, Bhutan, and Nepal.
- Designed MongoDB aggregation queries to identify over 90% of fraudulent transactions in the Anti-Fraud System (AFS).
- Handled multi-country go-lives, UAT coordination, and post-production stabilization for financial clients.

PROFESSIONAL EXPERIENCE

Independent Freelance Experience & Professional Development (CANADA)

Backend Developer – Marketplace Platform

Nov 2024 – Present

- Working as a Backend Developer for a live B2B marketplace platform ([PrecastXchange](#))
- Developing backend services using Java 21, Spring Boot, and Spring WebFlux (Reactive Programming)
- Experienced in AI-assisted development tools including GitHub Copilot, Claude, Gemini, and Codex CLI to accelerate feature development, debugging, unit testing, and technical documentation.
- Implemented OAuth 2.0-based authentication for Google login.
- Implementing file storage solutions using Cloudflare R2.
- Developing video upload and streaming workflows using Cloudflare Stream.
- Integrating Stripe payment gateway for secure payments and webhook processing.
- Designing MongoDB Atlas schemas and indexes
- Managing CI/CD pipelines using GitHub Actions and version control with Git.

Professional Development & Career Transition (Canada):

- Relocated to Toronto, Canada.
- Completed AWS Certified Cloud Practitioner – Amazon Web Services.
- Completed Canadian work authorization process. (Open Work Permit received Nov 2025)
- Upgraded skills in cloud fundamentals, cloud deployment, serverless design, and CI/CD pipelines.
- Prepared for the Canadian job market through hands-on backend development, architecture design, and system modernization.

Infrasoft Technologies Ltd — Mumbai, India

Nov 2021 – Oct 2024

Java Backend Developer | Associate Consultant

- Developed, deployed & optimized scalable microservices using Java, Spring Boot, REST APIs, and Spring Data JPA for Anti-Money Laundering (AML) and Anti-Fraud System (AFS) applications, ensuring modularity and high performance across distributed environments.
- Maintained microservices for customer onboarding, performing sanctions and watchlist screening against uploaded sanction lists (UN, OFAC, EU) to identify high-risk entities and ensure regulatory compliance.
- Implemented JWT-based Spring Security for API authentication and authorization.
- Integrated Apache Kafka to enable transaction streaming, event-driven communication, and instant fraud alert notifications to end users.
- Designed and developed ETL pipelines using Pentaho and Informatica to extract, transform, and load data from Core Banking Systems (CBS) and third-party sources into AML and AFS systems for regulatory and risk analysis.
- Configured and optimized MongoDB clusters, implementing aggregation queries for fraud detection analytics and transaction monitoring.
- Worked on CI/CD workflows using Jenkins and GitHub Actions to accelerate and standardize deployments. Implemented unit and integration testing to ensure code reliability and CI/CD readiness.
- Developed PL/SQL procedures and packages for IFRS 9 modules, calculating Expected Credit Loss (ECL) and automating provisioning across all three financial stages.
- Delivered Level 3 production support, including RCA, log analysis, database tuning, and deployment validation in UAT and production environments.
- Collaborated with cross-functional teams to ensure seamless data integration, performance optimization, and compliance across AML, AFS, and CBS migration initiatives.

Onward e-Services Ltd (Bank of Maharashtra) — Pune, India

Feb 2020 – Oct 2021

Software Developer (Java + PL/SQL + COBOL) | L3 Support Engineer

- Developed Java and PL/SQL-based backend modules for Remittances, Payments, and Core Banking Systems.
- Implemented high-volume file-based processing (SWIFT, NEFT, RTGS, ATM transactions).
- Monitored and supported EOD/SOD batch processes ensuring transactional data consistency.
- Provided L3 support — log analysis, root cause identification, and permanent issue resolution.
- Collaborated with DevOps teams for deployments and system stability improvements.

C-Edge Technologies Ltd (NABARD Banks) — Mumbai, India

Mar 2018 – Feb 2020

Assistant Systems Analyst (Java + PL/SQL + COBOL)

- Developed and supported General Ledger, Deposits, and Trickle Feed modules using PL/SQL, COBOL and Java.
- Created automation scripts in Shell for batch operations and job scheduling via Autosys.
- Delivered SQL query performance improvements in batch-heavy modules.
- Provided on-site application support and post-implementation bug resolution.

EDUCATION

- Bachelor of Engineering (B.E.), Computer Engineering Pune Vidyarthi Griha's College of Engineering, Pune, India — June 2017
- Diploma in Computer Technology, K. K. Wagh College of Polytechnic, Nashik, India — June 2014
